

Ride of Our Lives

Words & music by Glyn Lehmann

Verse

We're all travelling through space
Seven billion passengers; the human race
On this planet that we share
With the creatures of the land, the sea and air

In all the Universe as far as we know
It's the only place there is where all of us can grow

Chorus

Sops: We're all on the ride of our lives
Fellow travellers
Underneath the ever-changing skies
We're on the ride of our lives
Fellow travellers
Underneath the ever-changing skies

Altos: We're all on the ride of our lives
Fellow travellers
Underneath the ever-changing skies
On the ride of our lives
Can you believe your eyes?
All the life and the light
And the ever-changing...

Bridge

Altos: Sunny days, starry nights
The Southern Cross, the Northern Lights
The silver moon will wax and wane
Over sea and desert plain
A shooting star sheds its light
Leaves a trail across the night
And here on Earth wherever we go
We watch in wonder this awesome show

In all the Universe as far as we know
It's the only place there is where all of us can grow

Verse

Sops: We're all travelling through space
Seven billion passengers; the human race
Altos: On this planet that we share
With the creatures of the land, the sea and air

In all the Universe as far as we know
It's the only place there is where all of us can grow

Repeat Chorus
